

Cultivating the Future
of Environmental Education

What is the EcoEd listserv?

The free EcoEd listserv is a space to share information related to outdoor and environmental learning across New Mexico. This is made possible by EENM membership support. Please consider becoming an EENM member to invest in our community and enjoy all the benefits of membership by visiting our secure site at eenm.org/join.

All EcoEd posts will be moderated. Posts are submitted by sending an email to ecoed@googlegroups.com.

What's **allowed** (and encouraged!) on the EcoEd Listserv:

- Information sharing such as advocacy and funding opportunities
- Community events, programs, and courses
- Resources including curriculums, frameworks, etc.
- Relevant information-seeking emails
- Job postings and internships (as of June 2026)

What's **not allowed** on the EcoEd Listserv:

- Fundraising solicitations
- Items for sale or posts inquiring about items to buy
- Repeated submissions for identical or highly similar content
- Posts that lack a clear purpose or meaningful contribution to the group
- Posts unrelated to New Mexico or without a clear local connection.

Moderator discretion: Submission of content to this listserv does not guarantee publication. The moderator retains full discretion to approve, modify, or reject any submission based on its alignment with the listserv's guidelines.

Guidelines for submitting a post to ecoed@googlegroups.com:

1. Please make sure to update the subject of your email to the ecoed group and remove unrelated content from the email before sending.

*Environmental Education of New Mexico **supports a movement centered on people and landscapes** working towards equitable daily access to the outdoors and environmental learning for every child.*

2. Please utilize keywords in the subject line or first lines of the email. Example keywords include but are not limited to: Advocacy, Award, Community Dialogue, Events, Grant, News, Opportunity, Policy, Program, Resource, Seeking, Training.
3. Google Group allows for post formatting that is identical to format options in gmail. If your post is highly formatted, we recommend saving as a pdf and sharing that way. Users can both insert and attach files, such as pdf flyers, info-graphics, or posters, to the email.
4. Attend to when it's appropriate to reply all and when it is preferable to reply to only the original sender. Be careful about which button you press.
5. Share and respond thoughtfully and mindfully. EcoEd is a terrific tool but may not always be the correct tool for dialogue around a specific post. If the email topic has turned into a discussion, the sender or EENM may recommend moving the discussion to another forum.

Questions? Concerns? Please e-mail info@eenm.org.
